

15+ Specialty eLearning Courses Designed to Get You ICD-10 Ready

2015-08-13

At SuperCoder, we're all about skipping the filler and getting to the good stuff. That's why we created specialty-specific ICD-10 eLearning courses that get you up to speed on the ICD-10 guidelines and code changes that affect you most.

You can complete the ICD-10 training in about an hour total, and the audiovisual eLearning format lets you work through the training at your own pace and return to it throughout the year for a refresher when you want it.

Available courses include:

- Dermatology
- Endocrinology
- Family Practice
- Gynecology
- Hematology
- Internal Medicine
- Neurology
- Obstetrics
- Oncology
- Ophthalmology
- Orthopedics
- Pediatrics
- Physical Medicine/Rehab
- Podiatry
- Pulmonology.

If you didn't see your specialty in the list above, check out this list of courses coming soon:

- Cardiology
- ENT
- Gastroenterology
- General Surgery
- Mental Health/Substance Abuse
- Pathology/Lab
- Urology.

If you need General Training on ICD-10 (only \$29.95!), Practical Applications to keep systems and cash flowing, and Anatomy and Pathophysiology training, we've got targeted eLearning courses to support your needs in those areas, too.
