

Be Ready for HCPCS 2019 With Code Lists Now on TCI SuperCoder!

2018-12-12

Scope out the HCPCS 2019 changes when you log in to your TCI SuperCoder account to prep for updates! You'll need to get a head start before January 1 implementation to ensure your drug and supply coding aren't behind the times. Pay particular attention to units to avoid a top problem spot. And don't forget about those tricky Medicare-required service and procedure HCPCS codes, too.

To look up the additions, revisions, and deletions for HCPCS, log in to your TCI SuperCoder account. On your Coding Tools or Coder page, go to the left-side menu and select Coding/Upcoming Changes/HCPCS. There's a separate option for HCPCS modifiers, too, so you can see all the HCPCS changes you need to know.
