

ICD-10 Bridges Now Part of Your Code Search Subscription

March 19, 2014

ICD-10 Bridges Now Part of Your Code Search Subscription

Calling all Code Search subscribers! On March 18, SuperCoder added ICD-10 Bridges (ICD-10 GEM and Extended Bridges) to your Code Search subscription. You can now access the ICD-10 Crosswalk both from your code details pages (ICD-9 and ICD-10) as well as a standalone tool (ICD-9-CM ? Crosswalk) on your home page under "Claims Edits" Tab.

ICD-9 VOL 1 CODE LOOKUP 382.9 DETAILS

The screenshot displays the 'ICD-9 VOL 1 CODE LOOKUP 382.9 DETAILS' page. On the left, the 'Code Descriptor and Instructional Notes' section includes 'Unspecified otitis media' with sub-categories: 'Otitis media: NOS', 'acute NOS', and 'chronic NOS'. Below this is a 'Category Notes' section with a note: 'Use additional external cause code, if applicable, to identify the cause of the ear condition'. At the bottom left is 'Chapter Specific Coding Guidelines'. On the right, the 'Related Articles' section is expanded to show 'Crosswalks'. Three tabs are visible: 'CPT CROSSREF', 'ICD-10-CM BRIDGES', and 'DRG'. The 'ICD-10-CM BRIDGES' tab is active, showing a link 'ICD-9-CM Codes >> ICD-10-CM Codes' and a specific entry 'ICD-9-CM Codes 382.9 : Unspecified otitis media'. Below this, a table titled 'Result ICD-10-CM codes with description' lists codes under two categories: 'GEM' and 'Extended'.

Code Descriptor and Instructional Notes
