

ICD-9 XREF Expands to CPT-ICD-9 CrossRef

February 5, 2013

Tons of Coding Solutions subscribers asked for an ICD-9 to CPT® CrossRef and SuperCoder has now fulfilled that request three fold. Get the top associated CPT® codes for a given ICD-9 volume 1 code or vice versa from one of three new places.

- **On a complete ICD-9 code details page** under the green Crosswalks bar, click on the CPT CROSSREF tab. You'll see CPT ®codes associated with the page's ICD-9 code.

- Access the two-way tool **directly from SuperCoder's main menu by hovering over Coding Tools and selecting from the dropdown menu: CPT?ICD-9 CrossRef.**

Plug in a CPT® or ICD-9 code and results for the other codeset will appear.

- **On a Coder home page under the Tools & Reference bar**, click on the **CPT?ICD-9 CrossRef** tab (previously titled: ICD-9 XREF). You get instant access to the same tool that's available in the dropdown menu right on your Coder home page.

With the addition of CPT?ICD-9 CrossRef to Coding Solutions, be your practice's hero thanks to these added benefits.

CPT?ICD-9 CrossRef Saves Money,

- Dodge #1 denial reason by ensuring your ICD-9 code matches the CPT® code
- Match ICD-9 to CPT® codes and visa versa from one of three in-work-flow points.

Saves Time

- Look up CPT?ICD-9 code links as you're searching without switching places
- Jump from ICD-9 volume 1 code to associated CPT® code details in a single click - just click on a blue code

Gives Insight

- Research the potential source of repeat denials with **CPT?ICD-9 CrossRef**
- Autosuggests complete codes as you type so you get to your code faster.
