

Know Where to Go to Review 2017 ICD-10 Code Changes at a Glance

2016-10-26

Code update season can get hectic ... really hectic. But the good news is you don't have to get through it alone when you're part of the SuperCoder community.

SuperCoder's coding team has analyzed the ICD-10-CM and ICD-10-PCS changes, creating tools you can use to review new, revised, and deleted codes quickly.

Logged in members whose subscriptions include the code sets can access the tools from the Coding Tools page. In the left-side menu, open the Coding option. Click ICD-10-CM, scroll down, and click the last entry for 2017 Code Changes. A new page will open, revealing the changes divided by specialty. Members with access to ICD-10-PCS can follow similar steps to access a listing of new, revised, and deleted inpatient procedure codes.
