

Newsletter Page Layout Change Brings Combined Alert(s)-CMS Search Option, Single-Click Quiz Access, and Product News

August 9, 2012

Better Alert issue visibility, single-search across multiple documents, product news, and issue CEU quiz link are benefits of the new layout coming to SuperCoder.com Coding Newsletters Alert pages this August. The newsletter title will be displayed at the top of the page for quick recognition. Subscribers can read an issue or browse the alert archive. The Topic Search (currently the Enter Search Term or Coder box) offers Expand Search that allows searching across multiple Coding Alerts, CMS transmittals and manuals, Survival Guides, and codesets. Only subscribers who have access to Survival Guides and codesets will see those options. Streamlined CEU quiz access is a welcome time-saver. Subscribers can click "Take Quiz" to go directly to that quiz. Stay up to date on all product announcements by scrolling under the Alert image to the SuperCoder.com Newsletter News box.
