

# NCDs Containing ICD-9 Codes Now Under Compliance Tools

2012-07-26

Protect your payments with National Coverage Determination (NCD) listed for each of the 62 policies that include ICD-9 codes. Fast Coder and Coding Solutions subscribers will see the NCD tab under Compliance Tools whenever a CPT® or HCPCS code has an NCD containing ICD-9 codes. Click on the policy number to read the full text right on SuperCoder. You can even print the NCD to distribute as needed. Check out 83721 as an example.

The screenshot shows a web interface with a green header 'Compliance Tools' and a navigation bar with buttons for 'LCD LOOKUP', 'OPPS FEE SCHEDULE (OFC)', 'FEE SCHEDULES', 'NCD', 'OPPS EDIT CHECKER (OEC)', and 'CCI EDIT ALERT'. The 'NCD' button is circled in green. Below the navigation bar, a text box explains that the CMS National Coverage Determination (NCD) includes ICD-9 codes for the CPT® code and instructs users to click on the NCD number to view the full policy. A table below lists NCDs with columns for 'NCD#' and 'NCD Title'. A blue dashed arrow points from the 'NCD#' column to the 'NCD#' value '190.23' in the first row. Below the table, there are columns for 'Code' and 'Descriptor' with rows for '242.00' and '247.01'.

NCD#	NCD Title
190.23	Lipid Testing

  

Code	Descriptor
242.00	Toxic diffuse goiter without thyrotoxic crisis or storm
247.01	Toxic diffuse goiter with thyrotoxic crisis or
