

New Scrubber Features Keep the Focus on Accuracy While Saving You Time

May 14, 2014

SuperCoder's Real-Time and Batch CMS 1500 Scrubbers recently received an upgrade designed to reduce your workload and alert you to even more potential problem areas on your claims.

Real-Time CMS 1500 Scrubber

SuperCoder is constantly fine-tuning and updating Scrubber edits. Now you can see the results for your claim in an even clearer way, displayed in five distinct categories on each claim row.

Batch CMS 1500 Scrubber

Batch Scrubber users who choose the "Repair" option will benefit from the same user-friendly display seen above. Plus SuperCoder now offers more AutoFix edits with messages highlighted in blue so you can spot them quickly.
