

Ring In the New Year With January 2019 Updates on TCI SuperCoder

2018-12-19

The first quarter of 2019 is almost here, and the TCI SuperCoder team is already at work to ensure the updated coding data you need is ready on the site January 1.

Along with 300+ CPT® changes for 2019, there are HCPCS updates, too. And for accurate reporting and reimbursement related to those codes, be sure you're using our MUE and fee schedule tools with current data.

Before finalizing your claims, run your codes through our CCI tools. Don't forget that TCI SuperCoder now offers both Medicare and Medicaid CCI Edits Checkers to assist with cleaner claims. Like many of our tools, we update the CCI Edits Checkers each quarter.

That's just a small sample of the January data updates, and we're revising TCI SuperCoder extras like our lay terms and crosswalks, too, so we can help you make 2019 a happy and profitable year.
