

Welcome 2017 With SuperCoder's On-Time Updates

2016-12-21

When you start work in the new year, SuperCoder will have the new code data you need to start 2017 off right.

You'll be able to search CPT® 2017 codes, of course. On code details pages, review the lay terms for the updated codes to gather insights into proper coding. In the official guidelines on code details pages, watch for green text, which indicates changes to the guidelines.

The CCI Edits Checker will be loaded with the latest version, and you'll be able to access the 2017 CCI manual from the Coding Tools page and from the CCI Edits Checker tool page, too.

When you check the 2017 fee schedule information for your code, be sure to scroll down to the bottom to review the updated MUEs. When available, SuperCoder provides Medicare MUEs for practitioner services and facility outpatient services.

Those are just a few of the data updates the SuperCoder team is working on to help say, Happy New Year!
