IMPORTANT NOTE ABOUT THIS REIMBURSEMENT POLICY

This policy is applicable to UnitedHealthcare Medicare Advantage Plans offered by UnitedHealthcare and its affiliates.

You are responsible for submission of accurate claims. This reimbursement policy is intended to ensure that you are reimbursed based on the code or codes that correctly describe the health care services provided. UnitedHealthcare reimbursement policies use Current Procedural Terminology (CPT®*), Centers for Medicare and Medicaid Services (CMS), or other coding guidelines. References to CPT or other sources are for definitional purposes only and do not imply any right to reimbursement.

This reimbursement policy applies to all health care services billed on CMS 1500 forms and, when specified, to those billed on UB04 forms (CMS 1450). Coding methodology, industry-standard reimbursement logic, regulatory requirements, benefits design and other factors are considered in developing reimbursement policy. This information is intended to serve only as a general resource regarding UnitedHealthcare’s reimbursement policy for the services described and is not intended to address every aspect of a reimbursement situation. Accordingly, UnitedHealthcare may use reasonable discretion in interpreting and applying this policy to health care services provided in a particular case. Further, the policy does not address all issues related to reimbursement for health care services provided to UnitedHealthcare enrollees. Other factors affecting reimbursement may supplement, modify or, in some cases, supersede this policy. These factors may include, but are not limited to: legislative mandates, the physician or other provider contracts, and/or the enrollee’s benefit coverage documents. Finally, UnitedHealthcare strives to minimize these variations.

UnitedHealthcare may modify this reimbursement policy at any time by publishing a new version of the policy on this Website. However, the information presented in this policy is accurate and current as of the date of publication.

**Summary**

**Overview**

By definition, chronic kidney disease (CKD) is kidney damage for 3 months or longer, regardless of the cause of kidney damage. CKD typically evolves over a long period of time and patients may not have symptoms until significant, possibly irreversible, damage has been done. Complications can develop from kidneys that do not function properly, such as high blood pressure, anemia, and weak bones. When CKD progresses, it may lead to kidney failure, which requires artificial means to perform kidney functions (dialysis) or a kidney transplant to maintain life.

Patients can be classified into 5 stages based on their glomerular filtration rate (GFR, how quickly blood is filtered through the kidneys), with stage I having kidney damage with normal or increased GFR to stage V with kidney failure, also called end-stage renal disease (ESRD). Once patients with CKD are identified, treatment is available to help prevent complications of decreased kidney function, slow the progression of kidney disease, and reduce the risk of other diseases such as heart disease.

**Reimbursement Guidelines**

Beneficiaries with CKD may benefit from kidney disease education (KDE) interventions due to the large amount of medical information that could affect patient outcomes, including the increasing emphasis on self-care and patients’ desire for informed, autonomous decision-making. Pre-dialysis education can help patients achieve better understanding of their illness, dialysis modality options, and may help delay the need for dialysis. Education interventions should be patient-centered, encourage collaboration, offer support to the patient, and be delivered consistently.

Effective for claims with dates of service on and after January 1, 2010, Section 152(b) of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) covers KDE services under Medicare Part B. KDE services are designed to provide beneficiaries with Stage IV CKD comprehensive information regarding: the management of comorbidities, including delaying the need for dialysis; prevention of uremic complications; all therapeutic options (each option for renal replacement therapy, dialysis access options, and transplantation); ensuring that the beneficiary has opportunities to actively participate in his/her choice of therapy; and that the services be tailored to meet the beneficiary’s needs.

**Medicare Part B covers outpatient, face-to-face KDE services for a beneficiary that:**

- is diagnosed with Stage IV CKD, using the Modification of Diet in Renal Disease (MDRD) Study formula (severe decrease in GFR, GFR value of 15-29 mL/min/1.73 m2), and
- obtains a referral from the physician managing the beneficiary’s kidney condition. The referral should be documented in the beneficiary’s medical records.

**Medicare Part B covers KDE services provided by a ‘qualified person,’ meaning a:**

- physician (as defined in section 30 of Chapter 15 in the CMS Benefit Policy Manual),
- physician assistant, nurse practitioner, or clinical nurse specialist (as defined in sections 190, 200, and 210 of Chapter 15 in the CMS Benefit Policy Manual),
- hospital, critical access hospital (CAH), skilled nursing facility (SNF), comprehensive outpatient rehabilitation facility (CORF), home health agency (HHA), or hospice, if the KDE services are provided in a rural area (using the actual geographic location core based statistical area (CBSA) to identify facilities located in rural areas), or
- hospital or CAH that is treated as being rural (was reclassified from urban to rural status per 42 CFR 412.103).
**Limitations for Coverage**

Medicare Part B covers KDE services:

- Up to six (6) sessions as a beneficiary lifetime maximum. A session is 1 hour. In order to bill for a session, a session must be at least 31 minutes in duration. A session that lasts at least 31 minutes, but less than 1 hour still constitutes 1 session.
- On an individual basis or in group settings; if the services are provided in a group setting, a group consists of 2 to 20 individuals who need not all be Medicare beneficiaries.
